

## **NORTHERN IRELAND BRANCH, S.C.S.T.**

Dear Colleagues,

It has been almost a year since the launch of the SCSTNI web-site, so far this has had a good response from our members. For the renewal of your SCSTNI membership a new subscription form has been produced carrying the SCSTNI symbol along with an optional subscription form to pay by standing order. The registration date for membership has been pushed back to the 1st April.

Along with the new look form, a section has been added for your Email address. This is to allow us to more effectively contact yourselves with important information of upcoming events and news, as well as, allowing us to provide you with your logon details for the members section within the SCSTNI web-site.

- An interactive calendar has been added which allows greater flexibility in planning events and will give you more information as well as linking into maps of the location areas ([events@scstni.org.uk](mailto:events@scstni.org.uk)).
- The articles section is open to anyone who wishes to submit an article for publication on the site. Our 1<sup>st</sup> article was written by Mr. A. Caulfield regarding RCCP and state registration ([articles@scstni.org.uk](mailto:articles@scstni.org.uk)).
- The news section is updated with current events relevant to the Cardiac Physiologist in Northern Ireland and will also help us to promote important local events.
- The Documents section holds all our relevant documents as well as some guidelines from the main branch.
- The members section has recently been launched and will only be accessible by current SCSTNI members. This area is intended to provide a private forum where a wide range of issues will be open for discussion. An education section where teaching aids may be provided as well as a more complete documents section.

This web-site has been started to help all cardiac physiologists across Northern Ireland, but it can only do this successfully with the support of you, our members, so please do take the time to look through the site, provide ideas on how or what you would like to see, articles you may find relevant and wish to share. Let this be the medium which promotes the Cardiac Physiologist as a Profession and as a Professional.

Regards,

SCST NI Committee
